Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 5 is objected to because of the following informalities: Line 2 of claim 5 appears to lack a word after "outwardly". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,801,055 (Henderson).

The Henderson patent discloses a multi-well plate assembly comprising a well plate (14) having a top surface (44) and a plurality of well components (40) (col.4, lines 1-19). Each well (40) has an insert (22) equipped with a membrane (36). The top of the well has an upper portion, the lower part of well, below the membrane, is the lower chamber with the well sidewall extending between the lower chamber and upper portion. Inside of the insert (22) at the upper end comprises the claimed upper portion having an access port (30). The access port (30) has a first portion, top opening, and a step (38). See figures 2 and 4.

Allowable Subject Matter

Claims 1-4,6-10, and 12 are considered to be allowable over the prior art.

Claim 5 would be allowable if the objection to the claim is overcome.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

The prior art of record fails to teach or suggest a multiwell plate assembly with a plurality of upwardly open wells, each of the wells having a substantially square cross-section with pairs of adjacent walls defining pairs of opposed corners in each well, and an insert having a sidewall projecting down from a top wall and being substantially nested in one corner of the wells and a plurality of access ports aligned respectively with the wells, each said access port being substantially adjacent a corner of the well opposite the corner in which the insert sidewall is nested.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A Redding whose telephone number is 571-272-1276. The examiner can normally be reached on Mon.-Fri. 6:00 - 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Warden can be reached on 571-272-1281. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
